

Aviation English Language Proficiency test

Sabena Flight Academy, one of Europe's most respected Aviation and Pilot Academies, has recently been officially approved to perform certified ICAO English Aviation tests.

For this purpose, Sabena Flight Academy has teamed up with **Ordinate Corporation**, a leading language testing organisation. Based on ICAO guidelines the test focuses on 6 criteria, assessing both speaking and listening proficiency, in an aviation related environment.

The 6 ICAO criteria (Pronunciation, Structure, Vocabulary, Fluency, Comprehension and Interactions) will be measured over the **telephone** using the Ordinate automated testing system. This easy-to-use and highly reliable test is available for both aviation professionals and recreational aviators. Samples of the test can be found through the Ordinate.com website.

- Testing is possible at our training facility at **Brussels Airport, every weekday** from 9.00 till 16.30.
- The test consists of a 15 min. practice test and a 30 min. certification test.
- After successful completion, you **immediately** get an official Civil Aviation **Certificate**. With this certificate you can then go to your Civil Aviation Authority to have your licence endorsed.
- How to prepare? Before the test you will get preparation time and all necessary information concerning the test. The test is constructed to assess speaking and listening abilities. Although the test is set in an aviation context, this is not a phraseology test.
- How to book? Fill in the Candidates Record you receive from us and send it back, together with your preferred testing date. We will then confirm your booking.
- What's the price? Upon confirmation of the testing date, payment of 155* € is requested. Proof of payment is mandatory to perform the test. (* 21% VAT included)
